Experience

Senior iOS Developer

Mono Digital (Webmix)

Matchpub: <https://apps.apple.com/us/app/matchpub-live-video-chat/id1562311685>

I contributed to a large-scale video chat application with over 3M+ downloads.

- Swift, UIKit, SwiftUI, Socket, RestAPI, AgoraSDK

02.2024 - 12.2024
Ümraniye, İstanbul

Head of Mobile

Metatime Technology, Blockchain Based

Metatime:

- Swift, MVVM, Crypto Wallets, Sumsu KYC
- Kotlin, MVVM, Crypto Wallets, Sumsu KYC

A minimal app where users can manage their accounts and view their crypto balances. (like MetatimeCoin)

The company has ceased its operations, so the application is no longer available.

I began my career at Metatime as the iOS Team Leader, and after three months, I was promoted to Head of Mobile. In this role, I took on responsibilities including project management for both Android and iOS applications, creating Jira tasks, and defining technical architectures. As Metatime's first mobile developer, I established and managed the entire system, including selecting the necessary equipment, and built and led the iOS/Android teams.

Throughout this time, I worked closely with the CEO, CTO, and CPO on a one-on-one basis. Additionally, I managed all communication between the mobile department and other teams. After gathering the project requirements, I led the necessary R&D efforts. Our goal was to develop a modular super app, and I gained in-depth theoretical knowledge on super app development.

10.2022 - 12.2023
Pendik, İstanbul

iOS Team Lead / Senior iOS Developer

Appcent Mobi, In-house and outsource projects

During my time at Appcent, I contributed to various projects, where I primarily served as a developer and also took on team leadership roles in some of them.

Project Achieved:

Emlakjet - emlakjet.com, iOS Team Lead (Outsource)

Emlakjet: <https://apps.apple.com/tr/app/emlakjet-emlak-ara-i-lan-ver/id1194656334>

Online real estate advertisement.

Such as houses for sale or rent, land, villas, duplexes, workplaces, residences and housing projects.

- Swift, ReactiveKit, GraphQL, XIB, Programatically UI, I Designed My Own App Architecture, Incorporating MVVM as One of Its Layers.

10.2019 - 10.2022
Kadıköy, İstanbul

Hepsiburada - iOS Team Lead (Outsource)

Hepsipartner: <https://apps.apple.com/tr/app/hepsipartner/id1547526664>

Vendor Operations App for Hepsiburada.com

- Swift, VIPER, partial MVVM

Metro Türkiye (In-house)

Market App: <https://apps.apple.com/tr/app/metro-türkiye/id1490230544>

Online supermarket application.

- Swift, Custom Reusable UI Components, MVC, MVVM

Divarese (In-house)

Shopping App: <https://apps.apple.com/tr/app/divarese/id1502694914>

Online shopping application.

- Swift, Redesigned UI

Experience

Android / iOS Developer (Native)

Freelancer

Intervals

İstanbul

At various times, I worked on freelance projects, primarily providing support to companies I had previously worked with. This allowed me to maintain professional relationships while contributing to their ongoing projects.

Project Achieved:

budatamam

budatamam: This was a startup project, but it is no longer available.

Budatamam is a delivery system that fulfills market needs through local tradesmen or markets instead of its own warehouse. I was responsible for the development of native Android (Kotlin) and iOS (Swift) mobile applications. I built both Android and iOS applications from scratch.

Android

- Kotlin
- MVVM
- Koin DI
- LiveData
- Retrofit
- Single Activity Replace Fragment
- Partial Nav Component
- ConstraintLayout
- Component Base

IOS

- Swift
- MVVM
- Swinject DI
- RxSwift
- Moya Network
- Partial Coordinator
- Custom Navigation
- Programatic UI with Snapkit
- Component Base

iOS Developer

C-Level

01.2019 - 10.2019

Kozyatağı, İstanbul

At C-Level, I worked primarily as an iOS developer, focusing on delivering high-quality applications. I also supported Android projects, contributing to their development when needed.

Project Achieved:

Istanbullines

<http://www.istanbullines.com/>

RO-RO Online ticket sales and information platform.

- Swift, MVC

Asset Doctor

No longer available - <https://asset.doctor>

An asset management platform designed to streamline asset tracking and maintenance. With this software, users can manage a comprehensive list of company assets, update counts, add new assets, schedule maintenance, and perform quick searches using QR codes.

- Swift, MVC

Carbon Mobility

No longer available - <https://www.carbonmobility.com/>

It centralizes all vehicle data within your company onto a single screen, analyzes it, and transforms it into meaningful insights.

- Swift, MVC

Companity

No longer available - <https://www.companity.app>

A corporate social networking app designed to help you build strong business relationships within your team and transform your company into a thriving community.

- Swift, MVC, Pusher
- Kotlin, Activity App, Pusher

Experience

Android Developer

Collon Shot, My Project

Collon Shot - Balon Patlat: No longer available on the Play Store

I developed a native Android canvas-based game in Java, where the objective was to pop balloons. The animations were created frame by frame using PNGs, and since there was no physics engine, all calculations were handled manually. This project was a personal endeavor to deeply explore and understand the Android Canvas API and enhance my skills in low-level graphics programming.

- Java, Canvas API

2019 - 2020
İstanbul

Android Developer (Equity-based contribution)

Listele.app

Listele: No longer available on the Play Store

A platform that helps users find the cheapest prices for any product they are searching for. It also allows users to set price alerts and track products across multiple e-commerce websites.

2019 - 2020
İstanbul

Android / iOS Developer (Native)

Faturamatik Payment Institution Inc.

iOS: <https://apps.apple.com/tr/app/faturamatik-mobil-sube/id1347858931>

Android: <https://play.google.com/store/apps/details?id=ortakmarketim.ft.com.tr>

It's a mobile platform that provides the latest users to pay the bills such as services of electricity, water, telecom, natural gas, assurance and tax.

- Swift, MVC
- Kotlin, Activity App

03.2018 - 09.2018
Maltepe, İstanbul

Android Developer

Swipe - Edebiyat Yazar ve Eserleri, My Project

Swipe: No longer available on the Play Store

An educational app designed to help users learn about the most important authors and works in literature while preparing for the literature section of the YKS exams. The app features a True/False format for answering questions, making it engaging and easy to use.

- Java, Custom Design - Custom Component, SQLite, SQLite Cipher, AsyncTask, Native C String Encryption

2019 - 2020
İstanbul

Junior Android / iOS Developer

Komut Technology Software Base

A company specializing in developing applications for rent-a-car businesses.

Project Achieved:

Dijital Rent A Car

No longer available

Rent-a-car companies track details like vehicle damage, fuel levels, staff and customer IDs, and customer signatures, using representative images for damage documentation. Additional features include car rental tracking, periodic maintenance requests, tire requests, service appointment tracking, and request history management.

- iOS, Swift
- Android, Java

01.2016 - 06.2017
Maltepe, İstanbul

Android Developer

4.5G Kontrol, My Project

98K Download - No longer available

This application, developed during the introduction of 4.5G technology, checks the compatibility of your device and SIM card operator with 4.5G standards.

2016 - 2017
İstanbul
